

KEM SOLVE-1313

DESCRIPTION: KEM SOLVE-1313 is a NEW TECHNOLOGY, fast evaporating, solvent contact cleaner for all types of electrical and electronic equipment. Leaves no residues and has a high dielectric constant.

Effectively removes oil, grease, dust, moisture, etc.
Safe to all types of plastic and rubber.

BENEFITS:

- Ozone friendly - CFC free
- Non aqueous cleaner.
- Does not contain chlorinated hydrocarbons
- Ideal for electrical/electronic parts
- Low odor
- Fast evaporation
- No residue
- Safe on plastics

Formulated to replace the product of specification MIL-C- 81302 which usage has been forbidden since it destroys the ozone layer.

APPLICATIONS: KEM SOLVE-1313 can be used for industrial, office, military, aviation and marine equipment for cleaning all electric and electronic parts and as a general use cleaner, such as:

Circuits	Wires	Radar	Communication equipment
Switches	VCRs	Antennas	Distributors
Potentiometers	Radios	Telephones	Oxygen systems
Transistors	Tape recorders	Aviation material	Precision assemblies, etc.
Rheostats	Computers	Control panels	
Televisions	Typewriters	Sparkplugs	

It is used undiluted and may be applied by brush, dipping or non-atomizing spray. Ensure that all oil, grease, dirt, etc., are removed. The objects are allowed to dry.
No rinsing required.

SPECIFICATIONS & APPROVALS

- MIL-PRF-29608
- ASTM F-519, Type 1C

PRECAUTIONS:

Extremely flammable. For further instructions refer to Material Safety Data Sheet (SDS).

PACKAGING:

Is available in 4 lt, 20 lt. or 25 lt. metallic pails and 210 lt drums and 400 ml. spray – aerosol.

EUROCHEM S.A.
